the field of gerontology has often been criticized for being data rich but theory poor the editors of this book address this issue by stressing the importance of theory in gerontology while the previous edition focused on multidisciplinary approaches to aging theory this new edition provides cross disciplinary integrative explanations of aging theory the contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age related phenomena this edition of the handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging it is organized in seven sections reflecting the major theoretical

developments in gerontology over the past 10 years special features comprehensive coverage of aging theory focusing on the biological psychological and social aspects of aging a section dedicated to discussing how aging theory informs public policy a concluding chapter summarizing the major themes of aging and offering predictions about the future of theory development required reading for graduate students and post doctoral fellows this textbook represents the current status of theoretical development in the study of aging

praise for the first edition this book is exemplary in amassing demographic policy and sociopsychological data from around the world the content of the book is rich with current information seldom accumulated into one sourcei recommend this volume to gerontologists aging studies undergraduate and graduate students demographers and global studies scholars dr carol a gosselink psycritiques written by leading scholars this esteemed text on global aging is distinguished by its unique perspective on universal similarities and sociocultural differences across nations fully revised updated and reorganized the second edition presents comprehensive coverage of major topics in social gerontology and expands its treatment of health behavior health care families caregiving older workers and retirement it delivers new information on living environments religious beliefs and practices environmental threats cross cultural views of dementia ageism in advertising age friendly communities global immigration and cultural assimilation and end of life caregiving the second edition also offers additional case studies first person narratives and focused essays to enhance core material and a greater number of non western contributors the topical essays reflect changing mores and current issues affecting societies and the aging experience discussion questions conclude each chapter and an instructor s manual and powerpoint slides are available to instructors print version of the book includes free searchable digital access to entire contents new to the second edition expanded content on health beliefs and health behavior religious belief and practice environmental threats housing and living environments physical security consumer control of health care family life and more additional topics on global immigration and cultural assimilation age portrayals in advertising voluntarism and the use of social media in caregiving abundant new and expanded essays new case studies and first person narratives many more non western contributors key features delivers comprehensive coverage of major topics in gerontology uses a

unique comparative cross national perspective authored by world renowned aging scholars includes case studies essays personal narratives to enliven core information provides the most comprehensive demographic data on aging around the world

aging and work in the 21st century 2nd edition reviews summarizes and integrates existing literature from various disciplines with regard to aging and work but with a focus on recent advances in the field chapter authors all leading experts within their respective areas provide recommendations for future research practice and or public policy fully revised and updated the second edition takes up many of the same critical topics addressed in the first edition and incorporates twelve new authors across the volume and three brand new chapters on recruitment and retention legal issues and global issues in work and aging the intended audience is advanced undergraduate and graduate students as well as researchers in the disciplines of industrial and organizational psychology developmental psychology gerontology sociology economics and social work older worker advocate organizations such as aarp will also take interest in this edited book

print coursesmart

this text offers a readable and friendly presentation of the important methods findings and theories of human aging while actively involving the reader in meaningful exercises and critical thinking students are repeatedly challenged to apply information in the text to the older adults in their own lives specifically suggestions for enhancing the lives of their older relatives are offered and encouraged these include guidelines for discussions they might have regarding social emotional and environmental changes as well encouraging intellectual and social interaction in this edition emphasis on the science of the study of aging and why questions in aging are difficult to answer how social scientists attempt to handle such difficulties and the successes and failures social scientists have had thus far in answering those questions the text also demonstrates how current research findings are now being applied in the real world and or how they might be applied in

the future cross cultural comparisons and ethnic group comparisons are included wherever possible each chapter begins with senior view which introduces students to a real person and gives them a chance to hear what older adults think and say about important issues related to the chapter and a chance to compare those opinions to the research findings each chapter ends with making choices emphasizing the important behavioral emotional and social choices that students can make now to prolong a healthy happy life chapter projects offer the opportunity for active learning as students investigate for themselves an issue related to the chapter instructors can expand these projects for students who want to learn more or for independent study focus on aging boxes compliment the material in the text providing additional insight and examples and encouraging critical thinking every chapter includes discussion questions study questions chapter exercises and related online resources

this highly readable and successful new edition contains the knowledge essential to prepare for licensure and employment as a nursing home administrator the author uses the format of the licensing examination and the guidelines of the national association of boards of examiners of nursing home administrators as the basis for this text the new edition contains updated or new material on the use of computer networks and client server architecture theories of aging major organizations in long term care with website addresses the use of restraints extensive data from the first ever national federal database on nursing facilities deficiency patterns from 1993 1999 first time information on the number of special care beds new total nursing hour per resident day data percent of chain owned and hospital owned nursing facilities percent of residents with dementia and more in conjunction with its supplement the licensing exam review guide for nursing home administration this text has helped thousands of students become licensed nursing home administrators

contains the knowledge essential to prepare for licensure and employment as a nursing home administrator using as its basis the guidelines of the national association of boards of examiners of nursing home administrators this work includes sections on distinguishing delirium from dementia psychosis from agitation gerd and glycemic control

this text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging it continues the groundbreaking work of the first edition emphasizing a life span approach toward understanding the social interaction that occurs during later life the edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging positive and negative stereotypes toward older adults and health communication issues it raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people s lives the impact of nonrelational processes such as hearing loss are considered as they impact relationships with others and affect the ability to age successfully the book is organized into 14 chapters each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences as in the first edition when the literature is empirically based the communicative ramifications are then discussed readers of this volume will gain greater understanding of the importance of their communicative relationships and how significant they remain across the life span developed for students in communication psychology nursing social gerontology sociology and related areas communication and aging provides important insights on communication to all who are affected by the aging process

continuing in the tradition of the first edition whitbourne s identity process model serves to integrate the physiological with a psychological perspective the effects of physical changes on the individual are examined in terms of identity as well as the impact of identity on the interpretation of these changes the preventive and compensatory steps that individuals can take to offset the aging process are explored as well as with the first edition a major strength of this text is the author s illumination of complex biological concepts in a clear and accessible style the second edition includes new material focusing on demographic statistics chronic diseases the biopsychosocial perspective and successful aging this edition also features new charts tables and figures to highlight the text this is an excellent text for advanced undergraduate and graduate students in the fields of psychology gerontology and social work

this handbook focuses on the key areas in the psychology of ageing problems associated with later life development and change emotional problems and depression associated with loss of physical health and with losses and changes in the areas of social relationship and personal identity the important clinical context of service delivery including community care family care giving and institutional aspects a broad range of therapeutic orientations including cognitive behavioural psychodynamic and family therapy approaches it is hard to do justice to the breadth of material in this book i have found the reading of it both stimulating and enlightening despite believing that i was familiar with most of the topics and have no doubt that i will be using it for reaching and reference purposes into the next millennium if there is one book a clinical psychologist working with older people needs this is it steve boddington international journal of social psychiatry

this edition offers a clear account of the salient issues and concerns that dominate the field of adult development gender differences and race ethnic diversity are discussed in their relation to all major topics there is also new coverage on the impact of religion and spirituality

appropriate for sociology psychology and nursing students this textbook examines the biological and physiological changes that affect older people s daily functioning their risk of chronic diseases the psychological changes that can occur and the social implications of aging
